Miss Merle Reynolds spent Wednesday night with Misses Wanda and Ethel Chernault.

Mr. and Mrs. J. J. Chernault were guests Monday evening in the home of the Rev. and Mrs. J P. Leitner.

More Trucking Comfort In Store for Farmers

According to tips from automotive engineers, little pigs that go to market in trucks, and the farmers who drive them there will soon be getting the most comfortable rides they've ever had in farm transports.

These engineers say the trend in most new models of trucks is toward more comfort for the driver, with the aim of making his life happier — and also eliminating bad causes of accidents and damage to cargoes.

"Virtually every phase of truck operation is now being studied by truck manufacturers in an all-out drive to eliminate many of the jerks and jolts and destructive vibrations that cause damage," says W. L. Aiken, automotive engineer of SKF industries, incorporated.

Innovations of many kinds, he says, are now being built into trucks, with special emphasis on ways to cushion both the driver and his load.

Changes in absent voters' law are requested.

Flashlight Regarded 'Must' In Farm Homes

Survey Shows Many Needs For Use in Rural Areas

Even a farmhouse with electricity doesn't have enough light to illuminate all the places in and about a home where darkness means danger.

This was apparent from recent surveys disclosing that inside as well as outside a flashlight is a farm "must" for nighttime safety as well as convenience.

The principal uses of flashlights

A luminous flashlight is ideal for the denroom since it helps eliminate stumbling and groping for light switches.

revealed by the surveys have just been summarized in the following commandments for safety in the dark:

1. Carry Flashlights — On dark stairways to prevent falls. On highways at night. On your bicycle. In the car; one for changing tires, one for safety signalling by companion.

2. Keep Flashlights—Handy in the kitchen for outside chores at night or trips to the cellar. Near the bed; a luminous flashlight is ideal for the bedroom since it helps eliminate stumbling and groping for light switches. In the medicine cabinet; helps you find the right medicine, or to make a throat examination.

3. Use Flashlights—When gas fumes are suspected to be present. When you are changing a fuse in the fuse box. When checking the nursery or baby's crib at night.

According to W. S. Allen, general manager of the electrical division of Olin Industries, Inc., New Haven, Conn., the best general purpose flashlight is the two-cell, fixed focus type with a luminous case that glows in the dark. It can be located without stumbling or lighting matches. Under ideal conditions it will throw a beam 700 feet.

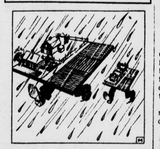
Lewis signs coal pact with some operators.

Making Most of Rain



Whether your farm loses two or 20 tons of topsoil per acre yearly due to erosion, depends on how you handle the water that falls on sloping fields.

Making rain work for instead of against you, is largely a matter of good soil management. Agronomists have found that soils high in organic matter soak up more water quickly and store it for growing crops.

Water "walks" instead of runs off well-managed land that has the benefit of soil-building rotations, deep-rooted legumes, plenty of fertilizer and conservation tillage methods. Water makes a quick getaway on naked, overcropped land that has been mined of its organic matter and plant nutrients.

Hookless Hog

This hookless hog, born near Danville, province of Quebec in Canada, keeps his nose to the ground at the farm of Gerard in France. Fated to go through life standing on his head, the pig was born without any hind feet and gets about in the acrobatic manner, shown here.

Feedlot Meat Tonnage Increased During Year

More meat tonnage produced in feedlots this fall and winter as a result of a generally favorable feeding ratio will provide consumers with a more adequate meat supply in the months ahead, according to H. M. Conway, livestock market analyst.

A near-record 1949 corn crop, added to the heavy carry-over from 1948, plus a generally plentiful supply of roughage helped sunplies

Radiant Heating Use Valuable to Farmers

Its Advantages Outweigh Initial Expensive Costs

Radiant heating, one of the newest developments in construction of farm buildings, has many advantages which outweigh its high initial cost, according to a publication dealing with building methods, materials and techniques.

As an example of a successful radiant heating system, the publication describes the installation of

This double Quonset turkey house, measuring 60 by 220 feet, has radiant heating to maintain a temperature between 50 and 70 degrees in winter. The house holds about 3,500 breeder hens, or 20,000 poults.

such a system in a turkey house on the farm of W. E. Wright in Mitchell county, Iowa.

This house, a double Quonset measuring 60 by 220 feet, is heated by hot water which circulates through copper tubing imbedded in concrete floor slabs.

The radiant heated floor is divided into quarters, enabling the temperature of each zone to be regulated independently. The temperature usually is kept between 50 and 70 degrees in the winter. About 3,500 breeder hens, or 20,000 poults can be housed in the building and can be cared for by three men.

Water for the system is heated by an oil burner in a room on the south side of the structure. Supplementary unit heaters are used when required during extremely cold weather.

The story of the radiant heating system used in the turkey house described was carried in the American Builder magazine.

Play safe—drive carefully.

Trinity Road

Trinity Road, Dec. 7.- The county was saddened this past week by the death of Miss Mary Savedge, county school supervisor. We regret the passing of this fine lady, who has served the county schools for fifteen years. Miss Nadine Burnett, Mrs. Mary Taylor and Mrs. Parks Jennings attended the funeral at Waverly Monday afternoon.

The Hebron W. M. S. will meet Sunday morning after the Sunday School. Topic: "Christ, the Answer for the World." Leader: Mrs. Clayton T. Drinkard.

A Christmas play, "the Manger," will be presented at Hebron Church Friday, December 23, at 8 P. M.

A mission study class will be held at Hebron Sunday at 2 P. M., by Mrs. Foster, of Lynchburg.

Mrs. Lula Taylor has concluded a month's visit with her daughter, Mrs. John Watson and family, of Staunton.

Mrs. Claude Martin accompanied her sister, Mrs. Mary Lloyd and family to Richmond last Sunday. They spent the Thanksgiving holiday with Mr. and Mrs. Louis Parris. Mr. Martin and Mr. and Mrs. Parris were in Richmond for the week-end. Mrs. Martin returned to her home with them.

Believe it or not, we have a fortune teller in this section! Guess who!

Here Are Timely Tips To Help Dairy Farmers

Three timely tips to help dairymen are passed along by C. S. agriculture. First, he said, the Rhode of the Illinois college of stalls in most barns are not wide or long enough for the larger cows. Second, cows should not be kept outside during cold rains. Third, harm is oftimes done by the dairyman neglecting the feet of heifers and cows. They should always be trimmed properly.
